- Peugeot, French automobile industry company
- ZF, German automobile industry company

### Network Engineer

2006 to 2008

- User support team leader for Repsol YPF Tehran branch and network supervisor of Kish island and offshore rig site branches
- Network administrator for OMV Austrian national oil company Tehran branch and network supervisor of Ahwaz and rig site branches
- Network administrator for Cameron Oil services company

NET1001, Tehran, Iran

#### **Project Manager**

2002 to 2003

NET1001 was a pilot project from Sharan Company which was fully outsourced to me. This project was the first online E-shop in Iran. I designed the entire network for this project and supervised the whole project.

Sharan, Tehran, Iran

#### **Network Administrator**

2000 to 2003

Maintain the network servers and services and providing all the requested IT supports.

- Create the network on Windows NT based network and migrate it to Windows 2000 based network in future.
- I received my first MCSE during this period and used it as much as possible on that network.
